You must have a lean and reliable operation in order to maximize profits. Knowledgeable decisions become essential to prevent costly mistakes. Any industrial plant depending on mechanical production assets needs to ensure maximum performance and reliability. Failure to do so, can lead to unexpected downtime that can reduce or completely interrupt plant production and profit generation.

Leading companies do not compromise their machine condition monitoring programs and jeopardize their profits. A proper asset reliability program is critical to your machinery health and should be performed by the industry's leading experts.

WATCHMAN™ Reliability services by Azima DLI puts the industry's leading experts on your team, offering you the greatest defense against unplanned and costly downtime.

## SOLUTIONS FOR A LEAN AND RELIABLE PLANT

With WATCHMAN, you'll receive a thorough evaluation of your reliability needs along with a tailored solution to meet your uptime objectives.

**WATCHMAN** provides three all-inclusive solutions:

### WATCHMAN Professional

Plants or enterprises with 250 or more machine assets, where unplanned outages cannot be tolerated, and downtime costs/penalties approach \$400K per hour or more. WATCHMAN Professional provides the procedures, processes, disciplines and qualified resources to achieve the highest standard in condition based maintenance.

### WATCHMAN Insight

Provides excellent coverage for moderate sized plants of 75 to 250 critical assets, where unplanned outages are inconvenient and costly, and downtime costs/penalties approach \$200K per hour or more. WATCHMAN Insight provides a solid foundation for a quality condition based maintenance program.

### WATCHMAN Select

Applied to smaller plants with 15-150 critical assets, the program is intended to meet compliance obligations and maintenance planning budgets, and unplanned outages and downtime costs/penalties approach \$50K per hour or more. WATCHMAN Select provides the essential elements of a growing condition based maintenance program.

### The Right Data Acquisition Tools

Subscription predictive services are best delivered in concert with plant participation.

ROUTE-BASED DATA COLLECTION

ONLINE AND REMOTE MONITORING

OIL SAMPLE COLLECTION

### The Right Way to be Informed

The WATCHMAN Reliability Portal™ provides secure access and automated alerts for all of your monitored equipment's condition; history trends, statistics and reports. Machine health information is widely available to all your decision makers.

### The Right Partner

WATCHMAN Reliability programs provide you with end-to-end solutions for your condition monitoring needs. Your program will be professionally managed by industry experts who are devoted to upholding the highest standards for reliability, availability, and uptime. Our bundled solutions will offer a comprehensive program that will deliver predictable asset availability.
