### AZIMA|DLI

WATCHMAN™ Reliability System

A managed condition monitoring system allowing our customers to implement a secure, scalable and efficient condition monitoring hosted by Azima DLI, the global condition monitoring provider to commercial industry, transportation and the military.

The WATCHMAN Reliability System is an implementation of software, data acquisition instruments, proven methodology and secure web-based communications that provide a robust infrastructure that our clients use to realize a high quality, sustainable and well communicated condition monitoring program. Clients benefit from a hosted system that is managed by condition monitoring and IT experts, so there is never an issue with system uptime, software upgrades and information accessibility.

The WATCHMAN Reliability System is comprised of several proven elements.

- Azima DLI data collection hardware; DCA-60™, DCX™ and Sprite™ online monitoring systems
- High availability, redundant Windows® 2008 Server™ systems operating at Qwest® managed data centers
- ExpertALERT™ Enterprise condition monitoring software
- WATCHMAN Reliability Portal™

Our clients benefit by using the same managed systems that Azima DLI utilizes to

Data Collection — Walk-around Data Collection; Remote & Online Monitoring Systems

Analysis & Information Distribution — WATCHMAN Data Centers; Internet Access to the WATCHMAN Reliability Portal; Vibration Analysts

implement its professional reliability services to customers throughout the world.

Hosted Solutions

The WATCHMAN Reliability System is available to our customers as either part of our WATCHMAN Analysis service offering or as a hosted solution for your internal plant or enterprise-wide condition monitoring program. Our hosted solution includes:

- 24/7 access to your company-branded portal
- 24/7 access to ExpertALERT Enterprise for your analysts, via Terminal Services to the Azima DLI data center
- IT systems engineers are onsite at the data center, ensuring high availability of portal system
- Daily database backups

- Rental options are available for portable data collectors and online systems
- Azima DLI condition monitoring experts can be quickly commissioned should you require a second-opinion of a machine assessment

WATCHMAN Analysis™

The WATCHMAN Reliability System may at any time, be coupled with Azima DLI's WATCHMAN Analysis™ services should clients lose critical internal analytical capabilities, ensuring their program never fails. Azima DLI has an extensive slate of machine experts that specialize in vibration analysis, infrared thermography, oil analysis, motor analysis and reciprocating engine and compressor analysis.
