

VSK2000 Vibration Switch Kit

Multi-Channel Vibration Switch

Product Features

Component system allows for the accelerometer to be installed at the optimum measurement point, while the signal conditioner, relay and display can be adjusted for your application.

- PLC, DCS, SCADA connectivity
- 24/7 monitoring with shutdown alarm
- Field configurable, multi-channel
- Dynamic outputs for vibration analysis

Cooling is required if internal temperature of RXE enclosure exceeds 140°F (60°C).

The kit includes:

RXE150

Vibration Protection & Relay System

- 24/7 protection for critical equipment for shutdown or alarm
- Accommodates up to four 4-20 mA signal conditioners and four relay units from remotely installed sensors
- For use with SC200 Series signal conditioners and RE200 Series relays (sold separately)

Cooling is required if internal temperature of RXE enclosure exceeds 140°F (60°C).

AC192 & AC194 Series

Compact, Multi-Purpose Accelerometer, 100 mV/g

- Accelerometers for analysis and process control
- Superior RF immunity
- $\pm 80g$ dynamic range, $\pm 10\%$ sensitivity

CB111-A2A

Yellow Teflon® Jacketed Cable with 2 Socket MIL
